# You Need Dry, Crisp-Cold Air," Said the R.E.

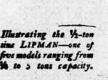

IT was the old story—the meat market proprietor was flinching under the "trimming" loss on meats and tired of facing a \$200 a month ice bill. But he aidn't know how to stop it.

Our Refrigerating Engineer was called in. He explained how ice quickly loses its cooling power; how it saturates perishables with moisture which tends to accelerate food decay; how it jeopardizes one's business by its undependability.

"What you need", said the Refrigerating Engineer, "is the dry, crisp-cold air of a LIPMAN Full-Automatic Refrigerating Machine. It keeps perishables in a temperature several degrees lower than ice can possibly do. It holds within 11/2 degrees of that coldness all the year 'round. Food cannot spoil. There is no "trimming" loss. And besides, a LIPMAN pays for itself in a short time, for it operates at a cost only a fraction of what you've been paying for ice."

MUTUAL SERVICE BUREAU, Inc. 1411 New York Ave. N.W. Washington, D. C.

We can give you the names of scores of LIPMAN users who would not go back to ice were it de-livered free. Phone us today and let our refrigerating engineer prove that a LIPMAN will save you time, trouble and a lot of money.
